REDWOOD RAILROAD TRANSPORTATION COSTS MENDOCINO COUNTY

William Hallin - Assistant Silviculturist
California Forest and Range Experiment Station^{1/}

Redwood logging costs for Mendocino County were presented in Research Note 20, "Redwood Logging Costs in Mendocino County" California Forest and Range Experiment Station. However, railroad transportation costs were shown only for trucks connected by tongues.

The following costs for ordinary flat cars were prepared subsequently and are presented as a supplement to Research Note 20.

Log costs per dollar of car costs are shown in tables 1 and 2. Tree costs are shown in table 3 and in figure 1.

The index costs are converted into actual costs by multiplying the index values by the ratio between the actual average cost per M and \$1.

^{1/} Assistance in the preparation of these materials was furnished by the personnel of Works Progress Administration Official Project Number 765-08-3-16.
